

That was then

and this is now...

Come experience a transformation from an old roofing system to a new high-performance roof system at **Frank Lloyd Wright designed **Marin County Civic Center****

Join CSI SCV Chapter for dinner and a presentation given by Scott Tyson, CSI, CDT of Sika Corporation.

Scott will start our evening by untangling the mysteries between liquid applied membranes with exterior coatings. He will enlighten listeners on the effectiveness and versatility of fluid applied membranes and why this roofing option is the only viable solution for complex waterproofing problems. Scott will conclude our evening with an explanation on how fluid applied membranes roofing system works best for historic preservation, façade repair and building envelop waterproofing projects.

About our Speaker: Scott joined the Sika Corporation in 2013 as the Western Region Building Envelope Specialist. In the role he served as a primary point of contact to the A/E/C community for all Sika product lines and led the Sika Cross Selling Team effort working in conjunction with 14 Sika staff in N. California. As of January 2018, he became the Western Region Technical Sales Lead for the Liquid Applied Membranes Division and is primarily responsible for Sika's involvement with the re-roof of the Marin County Civic Center. Scott is a graduate of the State University of New York – Utica holding a Bachelor's Degree in Business / Management with a concentration in Marketing.
